Take Your Skin to The Next Level with Hydro-Microdermabrasion

Hydro-microdermabrasion treatments are the most innovative way to rejuvenate and revitalize the skin. During a hydro-microderm treatment, the skin is refined with a diamond bit, while constant hydration is distributed to the skin. The pairing of microdermabrasion and hydration allows for a smooth, yet effective, exfoliation that yields positive results. This amazing service, offered here at Studio Booth, results in drastic improvement of the skin. Results are seen immediately, while best results are seen after six consecutive treatments. Long term benefits include diminished fine lines, minimization of hyper pigmentation, decreased appearance of scarring, and refined pores. These treatments can be done to both the face and body.
